Good news Tim on getting the report out. We will have a draft Report 3 early next week. This will cover Targeted analysis of all water samples.

Regarding your questions:

TimW,

Your track-change edits were helpful and all have been accepted. John worked to rework the paragraph where you had raised some questions. I think this is ready to go! Remember before you send:

- Insert relevant date
- Remove "DRAFT" water mark
- Somehow we need to send to Erica Bergman
- Rather than scanning, create pdf for higher quality print

Thanks.

Tim

Subject: NJ Report #2 NTA Soils and Vegetation

TimW et al.,

The attached report represents a huge team effort and is ready to be cleared and sent. We added a paragraph to the report intro to provide a bit of context and caveat the report explaining our goal of "simple" data reporting. That text is as follows:

The current data report has been fully reviewed and cleared by the Agency. It is intended to provide a simple representation and summary of the analysis results. Therefore, the description of methods and quality assurance are brief and high-level. Additional reports and/or publications are being developed that will include a much more detailed description of methods, quality assurance procedures, and statistical/geospatial interpretation of the data. As study partners/collaborators, we expect that NJ DEP will assist in these reports and publications. By their nature, preparation of these reports or publications will occur over a much longer time frame trading timeliness for detail and completeness.

A couple of reminders before you send.

- Update the date
- Remove draft water mark
- Somehow we need to send to Erica Bergman
- Rather than scanning, create pdf for higher quality print

Thanks.

Tim
